

Student Feedback Using Index Cards

Ask the students to answer the following questions on each side of an index card. Please note that the wording, “what worked” is important because it leads students to focus on the effectiveness of the instruction rather than what they “liked” or what was “fun.”

What worked for you [today, during the unit on X, while we were working on our presentations etc.] ?

What didn't work for you [today, during the unit on X, while we were working on presentations, etc.]?
