

Sample Weekly Lesson Plans/Assignment Sheet

| Day/Date | Homework to be completed before class on that day | Lesson Plans: what we will do in class on that day |
|------------------------------|---|---|
| Friday, December 13 | Yellow packet, problems 1-8 | Go over homework Practice problems 9 and 10 in small groups Collect packets Challenge problems on the board (5 teams of 3) |
| Monday, December 17 | Homework: two construction sheets, need to find the 5 elements you are working on | Return graded yellow packets 5 minutes: Go over homework in pairs-any questions? 8 Cool real-world and messy applications for this stuff with presentation rubrics handed out |
| Tuesday, December 18 | Finish problems and have a 2 minute oral presentation ready for the class | Put all 8 Cool real-world problems on the board, and have kids use 20 minutes to solve a problem other than their own, working individually. Groups will then present their own solutions Students will be evaluated both on their presentations and their solving on the spot of problems on the board |
| Thursday, December 20 | Complete review packet and check your answers | Full period test |
